

## Saskatchewan CPAP Supply Companies

---

The Saskatchewan Health Authority provides no-cost sleep lab and home testing services at the Sleep Disorder Centres in Saskatoon and Regina, most often by referral to a sleep physician.

Testing for sleep apnea is also offered by private oxygen or sleep apnea companies. Your doctor may refer you to one of these companies for testing or **continuous positive airway pressure (CPAP)** equipment support and sales. Please contact the company directly to arrange an appointment. People who meet specific criteria may qualify for a government-subsidized latest-generation CPAP machine through the Saskatchewan Aids to Independent Living (SAIL) program. CPAP's can be purchased privately or may be covered by private insurance with a prescription.

*Things to consider when looking for a CPAP Supply company:*

- What is the cost of testing?
- Which company is close to my home?
- Do the staff have an attitude of helpfulness?
- Will the staff spend time helping me to get the right mask fit?
- Is there a broad selection of mask and machines to choose from?
- Does the company have a return or exchange policy for masks and CPAP machines?

*Other questions you may wish to ask private companies before being tested for sleep apnea:*

- Does a Saskatchewan-Certified Sleep Physician interpret the tests? (A Saskatchewan-certified sleep physician is required to interpret sleep tests in order to qualify for a SAIL CPAP machine).
- How long will it take to receive my test results?
- Are your employees recognized/licensed healthcare professionals such as Respiratory Therapists, Nurses, etc.?
- Do you assist in the process to apply for a SAIL CPAP machine?
- Does your company provide follow-up support and remote monitoring, is there cost?
- Do you obtain an insurance estimate of coverage from my insurance provider prior to purchase?
- Does the company allow trials of different CPAP machines before I decide which one to purchase?
- Are there any other costs that I might incur?
- What are your patient care values?
