

PROTECT YOUR FAMILY:

Get CASH BACK with the Saskatchewan Home Renovation Tax Credit!

CARST and LUNG SASK are encouraging Saskatchewan residents to test for radon now. If radon levels are high, residents can claim mitigation expenses must be incurred on or after October 1, 2024 and on or before December 31, 2025.

STEP 1: Learn more about radon and order a test kit at HomeRadonTest.ca

OR, Find a certified professional to measure radon levels:
c-nrpp.ca/find-a-professional

Radon is a naturally occurring radioactive gas that enters homes from the ground. Radon exposure is the second leading cause of lung cancer after smoking. Radon is present in varying levels in every home and building in Canada, and exposure to high levels increases the risk of developing lung cancer. It is odorless, tasteless and colourless and the only way to know how much is in your home is to test.

STEP 2: If levels are high, use a certified professional to mitigate radon. Find a certified mitigation professional at c-nrpp.ca/find-a-professional

In Saskatchewan, recent testing found **35%** of homes tested had radon levels above Health Canada's action guideline (200 Bq/m³) and **73%** had levels above the World Health Organization's action guideline (100 Bq/m³).

STEP 3: Claim radon expenses under the Home Renovation Tax Credit. For more information visit saskatchewan.ca/home-renovation-tax-credit

Under this non-refundable tax credit, Saskatchewan homeowners may save up to **\$420** annually in provincial income tax by claiming a **10.5** per cent tax credit on up to **\$4,000** of eligible home renovation expenses. Seniors may save up to **\$525** annually based on maximum eligible home renovation expenses of **\$5,000**. Expenses must be incurred on or after October 1, 2024 and on or before December 31, 2025 to be claimed on your 2025 tax return.
